CHICODE

Dismantling Existing Societal Barriers Surrounding Minority Groups in Tech By Teaching Programming and Technical Literacy

Inside this Issue

- **Summer Courses**
- **ChiCode x GGMSA Workshop**
- **Podcast**
- **Co-Presidents' Letter**
- **New Team Members**

This July, ChiCode will be hosting summer classes which will consist of six programming-related courses:

- **Intro to Java**
- **Advanced Java**
- **Intro to Scratch**
- **Intro to Python**
- **Advanced Python**
- **Intro to Google Slides**

Our courses are a medium to reach thousands of students who lack the access to technology-related courses. We aim to give this opportunity to students around the world by providing customized guidance, one-on-one mentorship, engaging exercises, and thoughtful lectures.

SUMMER COURSES!

CHICODE X GLOBAL GIRL MEDIA SOUTH AFRICA

Workshop

ChiCode hosted a website development program with GlobalGirllMedia South Africa to develop their NGO website. This website will help GGMSA reach more clients through journalism.

GLOBAL GIRL MEDIA
SOUTH AFRICA

Special Thanks To:
GlobalGirlMedia South Africa
Nishi Kaura, ChiCode Co-Founder + Host
Bridget, GGMSA Director
Malaka, Participant
Letaldi Mathekga, Participant
Nokubanga Tshabalala, Participant

ChiCode's podcasts provide our students with opportunities to learn from the experiences of professionals working in the tech industry. This segment involves interviewing professionals working in the industry. These interviews give insights into the pathways that lead them to their careers. Our featuring guests also share advice and tips for students passionate about STEM to further inspire them.

PODCAST

Podcast #3 with Neha Mathur

Neha Mathur, who is a part of Government, Politics and Non-Profits (GPN) vertical at Meta India. She shares her journey that led her to work for a Fortune 100 company and gives advice to younger students looking to pursue a career in STEM.

"It is important to have an inquisitive mindset."

Podcast #4 with Rama Akkiraju

Rama Akkiraju is an IBM fellow, CTO of AIOps, and Forbes 'Top 20 Women in AI' 2017. She shares her thoughts on how to meaningfully get involved in our local communities and gives advice to younger students looking to pursue a career in STEM.

"Part of diversity and inclusion is knowing what the problems are, listening, and understanding."

CO-PRESIDENTS' LETTER

ChiCode is an organization anyone would be excited and honored to lead, to even be a part of. That includes us, the new Co-Presidents of ChiCode. We have been working with ChiCode for the past two years—joining as Chapter Heads and later being promoted to Co-Presidents–and throughout this whole time, we have been very grateful to contribute to this illustrious platform. We both have a history in coding and extensive technology use; therefore, we joined ChiCode in the hopes of utilizing that knowledge by helping marginalized communities gain free access to the introduction of innovative technology. We are immensely appreciative for the experiences and opportunities offered to us by ChiCode, each of which will not only help the students in our organization, but us, too. As Co-Presidents, we aspire to make positive changes in the organization that will expand our outreach to great extents.

We look forward to leading ChiCode,
Namya Bhandari and Navya Bhandari

NEW TEAM MEMBERS

Hansika PS
New Jersey, USA

Pooja Kaura
San Jose, USA

Amanda Lins
Bahia, Brazil

Yuvraj Singh
India

Rohan Kaura
San Jose, USA

Reana Akthar
New York, USA

Maitreyee Gangal
Ontario, Canada

Nancy Lim
Santa Clara, USA
